

NGC

Service for
Wind Power

EMEA Region

Available on demand, whenever you need us.

Professional. Fast. Individual.

Geared for a Better Future

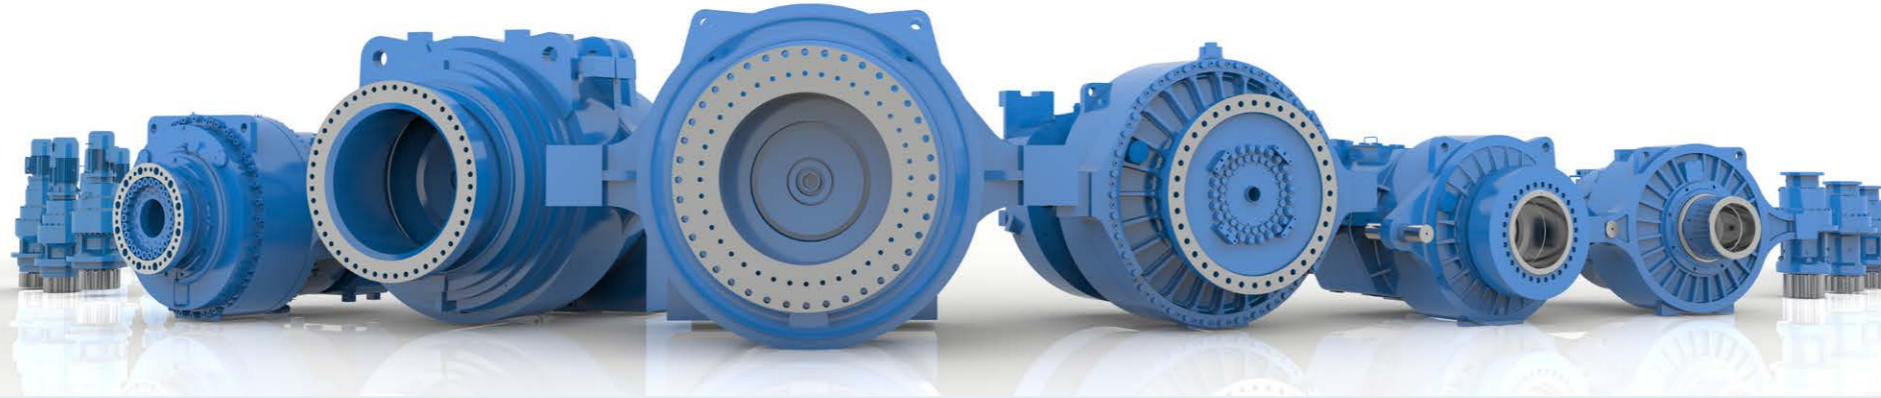

NGC has been one of the largest international manufacturers for wind turbine gearboxes, pitch gearboxes and yaw drives for more than 55 years.

Future-oriented drive train solutions and comprehensive services go hand in hand. This means we stay competitive, maximizing the productivity and profitability of your wind turbine.

108,000 NGC main gearboxes
are currently setting the pace in wind
turbines around the world.

Field Services

Whether for repairs, oil analyses, maintenance work or inspections: we are ready to spring into action on every wind turbine up-tower at short notice. NGC's high spare parts availability ensures short reaction times, and our expertise guarantees reliable execution operations.

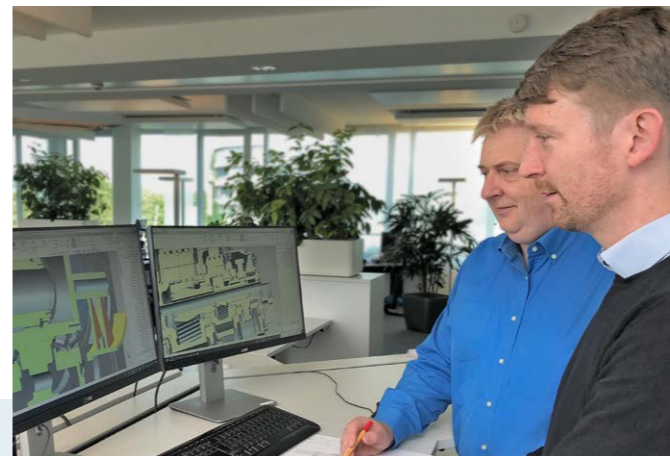

Our well-trained, experienced service teams and certified service partners are looking forward to their next mission.

Gearbox Inventory & Spare Parts

Rely on flexible and fast delivery of our products and spare parts to anywhere in the EMEA region. Having enlarged our warehouse capacities, main gearboxes, pitch gearboxes, yaw drives, and appropriate spare parts are on local stock, ready for delivery.

Technical Support

We run a technical competence center to ensure the best support at any stage of a service order. Consisting of design and service engineers as well as field service technicians, it bundles different in-depth knowledge and gearbox expertise. We are your safe pair of hands for all troubleshooting, failure analyses and service engineering jobs.

Extended Services

Our extended services cover gearbox aftermarket needs and often go beyond typical aftermarket service. NGC's top-quality service is based on the "all from a single source" philosophy, which minimizes product lifetime costs and maximizes profitability. Upgrades, warranty extensions, individual service contracts, inhouse repairs and trainings are all offered as extended services.

Need to replace your gearbox?

Check “current models ready to ship” by visiting our website:
